

## **PADI DEEP DIVER SPECIALITY**

Once you are an advanced diver you may wish to dive sites with a requirement of a deeper depth than 30 metres.

The PADI Deep diver speciality course is a safe, supervised introduction to deeper diving within the limits of recreational diving (no decompression stops).

The course will familiarise divers with skills, knowledge, planning, organisation, procedures, techniques, problems, hazards and enjoyment of diving between the depths of 18 metres and 39.5 metres, in a safe supervised environment.

You will be able to plan, organise and make no decompression dives up to 39.5 metres upon completion of the course.

The course involves four dives over two days at the weekend, during which your Instructor will assign tasks to be completed in the open water. The course will help you with your confidence and generally give you a better understanding of diving deep.
